Rules for Merging documents with multiple file data and level:

1. Thread documents with multiple files - only master inherited.
2. Thread documents with sub-files attached - only master inherited.
3. Thread documents that are physical media with assignments - no assignments (like checkout info) inherited.

Merge replaces Tina 1.5 Knitting, but with a few differences:

• Instead of UPDATING a Thread, when you thread records it creates a NEW thread with new Record Identification Numbers (RIDs).

• The old Thread and RIDs remain, but as non-editable records with the Lifecycle State *Merged*.

• You can merge document & its child records. The following rules will apply:

  • Merging can only be executed from the Favorites page.

  • The records must be Locked by you.

Merge ℹ

Order	RID	Identifier	Title	Version	Category	Change Inform...	Inherit	Expected Version
1	2305166	EWD-0000018	CONTROL PANEL CP-024A F	0.1.0.0	Electrical Wiring Di	Rev 0	▼	0.1.0.0
2	2305170	EWD-0000019	CONTROL PANEL CP-024B F	0.1.0.0	Electrical Wiring Di	Rev 0	▼	0.2.0.0

☑ Relationship
☑ Workflow
☑ Tree

You can decide what order the records should be in the new Thread by re-ordering them here. The *expected Version* number is generated based on the order of the RIDs in the Thread.

You can choose if you want to inherit information onto the new RIDs*

Your newly merged branches will be of category : Electrical Wiring Diagram

Change Category

Click *Merge* to proceed.
